

## PRODUCT DESCRIPTION

The BF STRETCH series is super-elastic covering polyurethane products suitable for thermal transfer on elastic fabrics such as LYCRA® and ideal for sports and technical garments.

The cutting line of all the films is highly visible and the workability of the product is unique. The polyester carrier is not adhesive and quick weeding.

The thickness of only 65 microns and its elasticity make the BF STRETCH series pleasant to the touch and conformable on any fabric. It is resistant to washing up to 60°C.
